CWP PRO SERIES

Coatings With A Purpose developed the **CWP ProSeries** line of cleaners based on our years of experience in industry, construction, facilities maintenance and building restoration. We developed our cleaners to have an exceptional ability to penetrate deep into both substrate and contaminant and have them chemically formulated to breakdown soil and stains with minimal dwell time and effort for a remarkable clean. The result: cleaners unmatched in performance.

- The most versatile cleaners you will ever use.
- Environmentally safe around plants, animals, and aquatic life.
- Contains no chlorine, solvents, phosphates and are non-flammable.
- Cleans nearly every surface in the home, garage, patio, truck, boat, and recreation vehicles.
- These are professional products powerful but safe to use in the workplace, hospitals, schools and around households, families, and pets.

4 Point Cleaning

1

BREAKS DOWN ORGANIC WASTE

ProSeries cleaners use a chemical process that penetrates organic oils and fats at a molecular level, breaking them down and making them water soluble so they can be washed away.

2

DENATURES PROTEINS

Protein stains are notoriously stubborn. Food, drink and pet stains can survive even harsh chemicals. ProSeries cleaners denature proteins, breaking their bonds allowing them to be flushed away.

3

DISSOLVES OILS

Oil & Water don't mix but ProSeries cleaners use our proprietary mode of action to penetrate and dissolve oil and heavy grease and grime so that they can be easily washed away.

4

EMULSIFICATION

The three processes above effectively release dirt, organic waste, oils, and stains from substrates allowing ProSeries emulsifiers to suspend the contaminants in solution so they are washed away.
